

Accommodation

The accommodation department manages and maintains a substantial portfolio of accommodation for staff, patients and visitors to the Trust. **If you are a patient and need more information about booking accommodation, please contact the department responsible for your care.**

Patient - Simon Patient Lodge provides 'step-down' rooms at St Thomas'. This facility is considered critical as it allows in-patient beds to be released where on-going clinical care is not required. Reservations should only be made by the referring clinical area.

Patient / Visitor - Gassiot House Lodge, at St Thomas's provides rooms which can be booked on a nightly basis by pre/post-appointment patients, accompanying relatives, carers and visitors to the Trust. This service is considered highly valuable given the number of patients treated in the Trust from outside the London area, who would otherwise find local accommodation cost prohibitive.

Gassiot House Lodge Accommodation Overview

Accommodation is available in four-share cluster flats located in Gassiot House. Each room features comfortable 4ft beds, together with complimentary toiletries and bath linen. In addition, each flat has two bathrooms with spacious walk-in showers, separate toilet and contemporary kitchen.

This unique facility at St Thomas's is specifically designed to provide a non-clinical environment to accommodate pre/post-appointment patients, accompanying relatives, on-call staff and clinical staff visiting the Trust.

The Lodge offers all guests a safe and relaxing environment, whilst having the reassurance of being a stone's throw away from the main hospital buildings.

Simon Patient Lodge Accommodation Overview

This unique facility is specifically designed to provide a 'step-down' environment to accommodate patients who would otherwise occupy clinical bed spaces, despite not needing on-going clinical care.

The patient lodge liaison officers thoroughly enjoy caring for the wide variety of patients seen every year, ranging from those who stay for just one night for pre/post-operative care, to those regular visitors who refer to the hotel as a 'home from home' when being treated for a long-standing condition.

The consistent hard work of this valued team ensures each patient feels confident that they are in a safe and relaxing environment.

The accommodation features of our 24 comfortable rooms include an en-suite, the reassurance of an in-built nurse call system, communal TV and reading rooms, and an inviting dining room where meals are provided.

There are specifically designed rooms for disabled patients, including shared adapted bathrooms with disabled facilities. In addition, there is one twin room available for carers to stay with the patient, however this is subject to availability.
