

PAEDIATRIC ECG COURSE

A one-day, in-person course delivered by an expert faculty of paediatric electrophysiologists, focusing on the interpretation of ECGs in neonates, infants and children. Through a combination of lectures, multiple small-group interactive workshops, and an 'Ask the Panel' session, participants will develop a systematic and practical approach to the recognition and management of childhood arrhythmias.

Aimed at Paediatric, A&E and PICU doctors and nurses

TOPICS
COVERED

- The normal paediatric ECG
- Paediatric tachy and brady arrhythmias
- Inherited arrhythmias
- Basics of cardiac devices
- Anti-arrhythmics and ablation therapy
- Ambulatory cardiac monitoring

Course Directors

Dr Leonie Wong, Consultant Paediatric Electrophysiologist, Royal Brompton Hospital

Dr Will Regan, Consultant Paediatric Electrophysiologist, Evelina Children's Hospital

Friday 1st May 2026

09:00 to 16:45
